

# RAHUL

FRONTEND DEVELOPER

## PROJECTS

### About Me

Having learned Frontend web development recently and done some projects, I am looking for a full time job as a software developer to contribute meaningfully and learn in a team environment. I am a team player who enjoys responsibilities and is always willing to learn new technologies.

## LANGUAGE

- English
- Hindi(basic)

## AltCampus

FullStack Development  
2022-2023

### Shopping-Cart

[Demo](#)

[Code](#)

Created a shopping cart project using React.js that allows users to add and display products in the cart, utilizing local storage for persistent data storage.

### Activity-tracker

[Demo](#)

[Code](#)

Developed a Activity-tracker Application using HTML, CSS, and React, creating responsive and dynamic user interfaces. I have tried to use various concepts of React like state management, prop drilling etc in the project.

### Dashboard

[Demo](#)

[Code](#)

Created a dashboard app project using React.js that shows us how to login user utilizing local storage for persistent data storage.
